i am pleased to write these words by way of a foreword to dr mahasen alj houb s book the advisory function of the international court of justice i do so with a sense of pride in the achievement of a fellow countrywoman and metaphorically speaking a sister in law my pride is coupled with hope and a nascent optimism that she and a group of young jordanian academics mostly recent graduates of universities in the united kingdom will contribute further and significantly to the teaching and dissemination of international law in jordan and if i do not strain hope by hoping too much in a region in which notwithstanding its past glory the culture of law has for too long been superseded by the logic of power politics and unbridled *raison d'état* my only hesitation in writing this foreword is that a particularly heavy court schedule has permitted me only a chance at a perusal of the contents of the book a perusal which whilst more than casual falls short of the serious study that it deserves yet i can unhesitatingly concur with the verdict of the internal and external examiners who praised dr aljaghoub s thesis as it then was for its thoroughness detail and authoritativeness on this important area of international law

proliferation of wmd technologies is by no means a new concern for the international community indeed since the signing of the nuclear non proliferation treaty in 1968 tremendous energies have been expended upon diplomatic efforts to create a web of treaties and international organisations regulating the production and stockpiling of wmd sensitive materials within states as well as their spread through the increasingly globalised channels of international trade to other states and non state actors however the intervention in 2003 by western powers in iraq has served as an illustration of the importance of greater understanding of and attention to this area of law as disagreements over its content and application have once again lead to a potentially destabilising armed intervention by members of the united nations into the sovereign territory of another member state other ongoing disputes between states regarding the character of obligations assumed under non proliferation treaty instruments and the effect of international organisations decisions in this area form some of the most contentious and potentially destabilising issues of foreign policy concern for many states this book provides a comprehensive analysis of international law and organisations in the area of wmd proliferation it will serve both as a reference for understanding the law as it currently exists in its political and economic context as well as an analysis of areas in which amendments to existing law and organisations are needed
