education has traditionally studied the world by bringing it into the classroom this can result in situated learning that appears to students to have no relevance outside the classroom students acquire inert decontextualized knowledge that they cannot apply to real problems the obvious solution to this shortcoming is to reverse the situation and bring the classroom to the phenomena to learn in a rich real world context the problem with the real world is that it is complex and filled with interactions that are hard to sort out the editors and authors believe that the right tools might help students with this sorting process and result in learning in rich contexts this book is an account of a series of experiments designed to explore the validity of this insight

in a broad sense technology is any modification of the natural world made to fulfill human needs or desires although people tend to focus on the most recent technological inventions technology includes a myriad of devices and systems that profoundly affect everyone in modern society technology is pervasive an informed citizenship needs to know what technology is how it works how it is created how it shapes our society and how society influences technological development this understanding depends in large part on an individual level of technological literacy tech tally approaches to assessing technological literacy determines the most viable approaches to assessing technological literacy for students teachers and out of school adults the book examines opportunities and obstacles to developing scientifically valid and broadly applicable assessment instruments for technological literacy in the three target populations the book offers findings and 12 related recommendations that address five critical areas instrument development research on learning computer based assessment methods framework development and public perceptions of technology this book will be of special interest to individuals and groups promoting technological literacy in the united states education and government policy makers in federal and state agencies as well as the education research community

most if not all standards for science and technology education and curriculum indicate that knowledge of the nature of

technology is an educational goal yet the literature lacks an established definition for the nature of technology additionally the research on student ideas about the nature of technology is insufficient after reviewing the literature on science and technology education the philosophy of technology and the history of technology this study presents an internally consistent definition for the nature of technology this definition illustrates how the nature of technology includes five dimensions technology as artifacts technology as a creation process technology as a human practice the history of technology and the current role of technology using an interview protocol developed for this study a small group of 5th and 8th grade students were interviewed to ascertain their ideas about the nature of technology the results indicate that there are a variety of ideas present in the thinking of young people all of the participants expressed one of two ideas about technological artifacts technological artifacts are electronic or technological artifacts are invented all of the participants identified particular skills needed to invent technological artifacts some of the participants included mobility and concluded that disabled people cannot be inventors despite their experiences with technological artifacts including educational technology tools a few of the participants were uncertain whether they would identify themselves as technological more than half of the participants did not believe older artifacts can still be considered technology most of the participants were apprehensive about our technological future the main issue expressed by the participants was the environment other than environmental concerns most of the participants were unable to identify global issues regarding technological use and development overall these findings increase our knowledge of the ideas young people have about the nature of technology which can inform future research on teaching and learning about science and technology
